Profile Summary

- Full-Stack Developer specializing in the Java Full Stack, with a strong focus on building scalable and user-centric web applications.
- Experienced in creating dynamic projects with seamless front-end and robust back-end functionality.
- Passionate about solving real-world problems and continuously enhancing technical expertise.
- Working on a real-time service management system for apartment residents. My problem-solving ability allows me to debug, optimize, and enhance applications for better performance and usability.

Projects

Go Green Plant Nursery

2023-24

Tools: Html, CSS, JavaScript, Bootstrap

Go Green is an online plant nursery platform designed to view all plants of a nursery. It allows users to browse plants online, along with essential gardening tools and accessories.

Responsibilities:

- A categorized list of plants with descriptions, prices, and care instructions.
- Created a user-friendly interface for smooth browsing and shopping.
- Reduced unnecessary re-renders and optimized component lifecycle for better performance.

Personal Portfolio

Tools: Html, CSS, JavaScript, ReactJS

Developed a responsive and visually appealing personal portfolio using **React.js** to showcase projects, skills, and contact information

Utilized component-based architecture for reusability and clean code structure.

Academic Achievements

- Elected as "Sport Secretary" for college sports for academic year 2023-24.
- Successfully organized and coordinated the Blind C competition, a coding challenge that tests logic and programming skills without an editor preview.
